

Ecclesiastical Electricity (EE)

Christians in Reading working together against climate change.

Reading Christian Ecology Link

is launching a scheme to produce

GREEN ELECTRICITY

from solar panels on a church roof in our town.

Does your church have a good south-facing roof?

Please join the competition for the most suitable location.

Would you like to make a donation

or offset your holiday carbon emissions?

(eg donate £5 to EE to offset a flight to Spain)?

Encourage your church to offset its carbon emissions

by supporting this project!

Redland Park URC, Bristol – could your church be this witness in Reading?

**Come and find us at the RCEL Operation Noah stand at
Forbury Fever on June 6, 11 - 4 in Forbury Gardens**

*There will be lots of other stands, activities and entertainment on environmental
themes for all ages.*
